Description

HERITAGE Bollards are manufactured from engineering grade polymer – Ultrathane, cast onto a central steel core. A highly versatile material, in a cast iron finish, Ultrathane can be used to create or preserve the traditional Victorian theme.

The durability of Urethane makes it a preferred material in the specification of street furniture. It will not rust or corrode and is resistant to many chemicals including saline and uric acid. It is also chip and highly abrasion resistant. This gives Ultrathane products a longer, maintenance-free life span and helps to reduce ongoing costs.

Applications include walkways, car parks, shopping centres, town centres, warehouses, quaysides, demarcation – in fact anywhere with a requirement to prohibit / restrict the use of vehicles within a given area for the safety of pedestrians and property.

Asda type 1 standard car park bollard in fully pigmented, self finished, high impact resistance, low maintenance polyurethane grade 1950. Cast onto a central 114mm dia steel core with anchoring bars. Complete with white Class 1 reflective tape.

Specification

- HAG: 950mm
- Diameter: 140mm
- Root: 500mm
- Root Size: 114mm
- Material: Ultrathane
- Bollard colour: Asda Grey
- Weight: 18kg
