Description

The Removable Domed Top bollard is made of a round mild steel tube. Tubular bollards have a slightly domed welded steel cap. The bollards are supplied galvanised as standard, and colour-coated finishes are available to order. The bollards can be used to protect buildings, shutter doors, etc., from accidental or deliberate vehicle impact.

Options:

The removable domed bollard can be ordered galvanised or galvanised and hand-painted in a RAL colour of your choice.

Specification:

- Galvanised finish is standard
- Wall thickness 3.6mm
- [Fixed version](#) available

Size:

114mm D x 1400mm overall length as standard

Installation:

Cast socket into concrete approx 267mm deep by 300mm square, allowing for drainage from the bottom of excavated socket hole. 150mm -165mm diameter cast in 400mm deep minimum by 300mm square minimum.

Delivery Time:

7 - 14 working days
