Product Images

Description

The removable bollard version has a socket which provides total stability and is secure and tamper proof thanks to the unique locking system.

Locks & unlocks with an 11mm triangle key, the bollards are lifted out in the upright position. 100% galvanised internal mechanism for complete corrosion protection.

The central boss is inverted and locked in place after removal of the bollard. Flush with the ground galvanised with lacquered finish. Drains naturally through the sub surface gravel. A reservoir allows the accumulation of sand or gravel to be removed for easy maintenance. All above ground parts are lacquered in black.
