Description

The SS Circular Hardwood Timber Bollard is available in a variety of sizes and can have a series of changes made to the original style.

Shelter stores timber bollards offer a natural fit to any rural or urban environment. They are an ideal fixture on educational centres, town centre schemes/street landscaping, park entrances, pedestrian and shopping precincts and promenades. Timber bollards are manufactured from hardwood source from forests under conservation and re-plantation programmes. A softwood timber bollard is also available. Hardwood timber bollards are available in either Green Oak (which is fresh cut) or Air-dried European Oak (which is seasoned for 5 years). The European Oak has a moisture content of around 18 - 24% and will not absorb any more moisture, meaning that they will keep their shape. There bollards are also available in a removable version.
